

GuardWare
PROTECT

Eliminates Data Theft Permanently

Achieve 100% Data Protection & Control

- ✓ All the Time
- ✓ Any Data type
- ✓ Everywhere
- ✓ Remote Kill

A Global Problem: A Single Crack and Your Data is Gone.

Billions invested in cybersecurity – yet your data remains defenseless.

Market Gap

Data remains vulnerable to authorized access

No way to destroy lost or stolen data

No way to secure non-standard data like design files and source code

No way to guarantee data destruction

No way to control data once shared with suppliers

No way to enforce NDAs

Solution: Build Data Self Defence

GuardWare PROTECT Persistently Encrypts and Secures Files of All Types All the Time

Hybrid Encryption. AES 256 & RSA 2048 Combination.

Highly Robust. Supports Offline, Online and Hybrid Operations.

Persistent. Stays Secure Even When in Use.

Control All Data Through Centrally Managed Keys.

Unique Format Preserving Encryption. Transparent to User.

Unique Key for Each File. Enhancing Resilience.

Supports Non-Standard Files like Design & Source Code.

Unique Wrapper Tech Allows Metadata Definition for Non-Standard Files.

Files Auto Encrypted: By Content, By Origin, By Type, By App that produces it, By Location, By User or Device, By Classification labels, By User intervention

GuardWare Encrypted Files Remain Secure All The Time.

When Stored
Anywhere

When Transferred
Using Any Method

When In Use
By User or Application

Effortless

Data disposal made easy,
simply destroy the keys
